- *15. If two straight lines intersect, the vertically opposite angles are equal.

PARALLEL STRAIGHT LINES.

- *16. When a straight line cuts two other straight lines, if
(a) a pair of alternate angles are equal, or
(b) a pair of corresponding angles are equal, or

3. The candidate's height will be measured as follows:—He will be placed against the stadiometer with his feet together, and the weight thrown on the heels and not on the toes or outside of the feet. He will stand erect without rigidity, and with the heels, calves, buttocks and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be recorded in inches and parts of an inch to quarters.

4. The candidate's chest will be measured as follows:—He will be made to stand erect with his feet together, and to raise his arms over his head. The tape will be so adjusted round the chest that the upper edge touches the inferior angles of the shoulder blades behind, and its lower edge the upper part of the nipple in front. The arms will then be lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to take a deep inspiration several times, and the maximum expansion of the chest will be carefully noted.

The minimum and maximum will then be recorded thus in inches, $\frac{1}{4}$, $\frac{1}{2}$, etc.

In recording the measurements, fractions of less than half-an-inch should not be noted.

(b) A candidate will be considered fit if he has one eye (R. or L.) with vision of not less than $\frac{6}{9}$, and with a good field of vision as tested by hand movements, provided that—

His vision in the other eye is $\frac{6}{18}$, or not less than $\frac{6}{12}$ without glasses and capable of correction to $\frac{6}{6}$ with the aid of glasses.

(c) Each eye will be examined separately. The candidate will be required to read the tests in ordinary daylight.

(d) Inability to distinguish the principal colours will not be regarded as a cause for rejection, but the fact will be noted in the proceedings and the candidate will be informed.

(e) The degree of astigmatism of vision of all candidates for commission will be entered in the proceedings in the following manner:—

Y. R. = with glasses =
Y. L. = with glasses =

Fort St. George, July 4, 1879.

The following Government Order is published:—

Q.D. No. 833 W., dated 4th July 1979.

It has been brought to the notice of Government that the procedure prescribed in paragraphs 466 to 471 of the Public Works Account Code regarding the accounting for and the recovery of expenditure on deposit works incurred in the Public Works Department on behalf of local bodies requires modification in view of the orders passed in G.O. No. 2185, J. & M., dated 27th September 1929, encouraging local bodies to deal as far as possible with the Imperial or other approved bank. It has been decided with the concurrence of the Accountant-General that the procedure prescribed in paragraphs 462 to 466 of the Public Works Account Code is modified in the Annexure should be followed in future. Paragraphs 467 to 471 will be deleted.

ANNEXURE

CHAPTER XV.—NON-GOVERNMENT
WORKS.² H. Dreyer-Wasson.*L. Gougeon*

453. When a deposit work is to be carried out, the local body or other party concerned should advance the gross estimated expenditure or the share which is payable by it, to the Divisional Officer in one lump sum, or in instalments and by such dates as may be specially authorized by a competent authority subject to the control of the local government—vide paragraph 252 of the Public Works Department Code. Where payment in instalments is authorized owing to the difficulty of depositing the full estimated amount in advance in the case of larger works, the Divisional Officer should forward the requisite payments on each work work for the same time periods and apply to the local bodies concerned for the funds and the latter should without delay pay the instalments to the Divisional Officer. The amount received should be credited in the accounts by the head "Public Works Deposits" against which will be charged all expenditures incurred up to the amount of the deposits. As regards the expenditure in excess of deposit, see paragraph 410.

1. If pedicured, the local body concerned may be authorized to pay the deposit direct into the treasury. In this case, the accompanying chain should state clearly that the amount is creditable to the Public Works Department, naming the division and the work to which the deposit relates.

2. In the case of a local body which has not withdrawn its balances from the Government treasury, it may be authorized to draw a cheque on the treasury in favour of the Executive Engineer and this will be paid at the treasury by transfer credit to the Executive Engineer's account (Public Works Department). Similarly for the unexpended balances the Executive Engineer will draw a cheque in favour of the local body by transfer credit to the deposits of local funds.

463. A consolidated record of the transactions of a month relating to all Deposit works of the division should be prepared in Form 65, Schedule of Deposit Works. This schedule shows, in respect of each work, the amount of deposits received and the expenditure incurred, both during the month and up to date.

1. Schedule of unexpended balances of completed works should be taken in reflection of the deposits and, therefore, shown in the schedule in same notations and not in duplicate.

464. The amount of each deposit should be ratably divided into two parts, one representing the share available for works expenditure and the other the total amount chargeable on establishment, tools and plant and audit and accounts charges, if any, recoverable under the rules—vide Appendix 7. In the schedule, the deposit received for each work should be numbered as a single item, but the transactions relating to the two parts of it should be shown separately, thus—

For Works expenditure,
For percentage charges.

45. The percentages payable should be adjusted month by month as the works expenditure is incurred, but the Accountant-General may authorize the adjustment to be made once a year in the accounts of March, provided that if the accounts of a work are closed in an earlier month the adjustment must be made in that month.

II. District Road Works and Municipal, Cantonment and Port Trust Road Works.

466. The procedure prescribed in paragraphs 452 to 465 above will apply.
